Select Menu

version 16 for Adobe Illustrator CS6 - 2021

Select for Adobe Illustrator C6 adds items to the Select->Object menu. Illustrator CC added Point Text Objects and Area Text Objects, so Select Menu adds them for CS6 users as well. In addition, it adds the following 25 items:

- Legacy Text Objects
- Path Text Objects
- Guides
- Paths
- Open Paths
- Closed Paths
- Filled Paths
- Unfilled Paths
- Stroked Paths
- Unstroked Paths
- Dashed Paths
- Undashed Paths
- Compound Paths
- Styled Art
- Unstyled Art
- Opaque Art
- Transparent Art
- Symbols
- Groups
- Live Objects
- Gradient Meshes
- Raster Art
- Placed Art
- Graphs
- Plugin Art

While opening Illustrator's Select > Object menu, press the Alt/Option key to have the plugin check the current document for instances of the corresponding object type and disable all item types not found. This can take several seconds in a complex document, so the menu's default behavior is to enable all items.

Requires Adobe Illustrator version CS6 - 2020 on either Mac or Windows.

To install the plugin, just drop it into Adobe Illustrator's "Plug-ins" folder. It doesn't matter if you put it in a subfolder you create (just to keep things tidy) or at the top level of the Plug-ins folder.

The correct path to the main plugins folder under **Windows (64-bit)** is:
Windows (C:)\Program Files\Adobe\Adobe Illustrator[version]\Plug-ins

The **Windows 32-bit** path just adds the "(x86)" like this:
Windows (C:)\Program Files (x86)\Adobe\Adobe Illustrator [version]\Plug-ins

On a **Mac**, the path to the plugin folder is:
/Applications/Adobe Illustrator [version]/Plug-ins

——

Because of changes made in Illustrator's plugin interface with CS6, all Graffix plugins for CS6 and above were totally re-written using the CORE libraries from Hot Door, Inc.

No payment is required, and no guarantees are made. Be sure to check the Graffix Web site for updates and other new products. Your comments, suggestions, and bug reports are welcome.
